# **LED Driver**

# CCD-36W-350mA-L-PRO

### Product description

- Constant current LED driver
- Ideal for linear and panel lights
- Terminal Block for quick connection
- High Power factor > 0.95
- Flicker free
- Protection: open circuit, overload, over temperature
- Simple installation via clips or screws
- Up to 90 % efficiency
- Long life-time up to 50,000 hours
- 5-year guarantee

### Housing properties

- Low-profile metal casing with white cover
- Type of protection IP20

### Functions

- Overload protection
- Short-circuit protection
- No-load protection
- Surge protection voltage 2 kV (L/N to earth)

## Technical Data:

Technical data				
Rated supply voltage	220 – 240 V			
AC voltage range	184 – 264 V			
Typ. input current (at 230 V, 0 Hz, full load)	0.18 A			
Mains frequency	50 / 60 Hz			
Ambient temperature rang	-25 +55° C			
tc	85° C			
Max. output power	38 W			
Output current tolerance	± 5 %			
Output LF current ripple (< 120 Hz)	± 3 %			
l rate	350 mA			
Type of protection	IP 20			
Classification acc. to IEC 62031	Built-in			
ESD classification	Severity level 2			
Dimensions L x W x H	210 x 26 x 22 mm			
Hole spacing	200 mm			
Life-time	50,000 h			
Guarantee	5 year			

## Electrical characteristics :

ТҮРЕ	Input Voltage	Output Power	Output Current	Output voltage	Efficiency	Power Factor	THD
CCD-36W-350mA-L-PRO	220-240 V AC	36 W	350 mA	60106 V DC	90%	>0.97	<10%
		L				L= 210 mr W= 26 mr H= 22 mr M=200 m	ກ ກ າ m
		М			+ <b>J</b> _ <b>!</b>		

## Input Characteristics Test Report:

Voltage:	230.45 V
Current:	0.181 A
Power:	41.02 W
Power Factor:	0.9821
Frequency:	50 Hz

## Short-circuit behavior

In case of a short circuit on the output side (LED) the LED Driver switches into hic-cup mode. After elimination of the short-circuit fault the LED Driver will recover automatically.

#### No-load operation

The LED Driver works in burst working mode to provide a constant output voltage regulation which allows the application to be able to work safely when LED string opens due to a failure.

## Overload protection

If the maximum load is exceeded by a defined internal limit, the LED Driver will protect itself and LED may flicker. After elimination of the overload, the nominal operation is restored automatically

## Wiring example:

#### Wire preparation:

The wiring can be stranded wires with ferrules or rigid wires with a cross section of  $0.5 - 1.5 \text{ mm}^2$ . Strip 8.5 - 9.5 mm of insulation from the cables to ensure perfect operation of the push-wire terminals.
